Copra-Max

PREMIUM COPRA MEAL

Copra-Max is produced for us by the Lindt & Earthworm Foundation's 'Sustainable Farming Project' in the Solomon Islands. Local farmers hand pick the coconuts, remove the white flesh and sun dry it. The oil is extracted using a screw / expeller press and then ground down to produce the final product.

Copra meal is a very palatable food source loved by most horses. It is high in protein and rich in oil. Copra-Max has less than 1% starch, making it suitable for most horses with conditions such as Cushings Disease, Laminitis, Equine Metabolic Syndrome, Tying-Up, and many others.

Biosecurity protocols stipulate that copra meal must be roasted to destroy any possible contaminations.

We select the lowest roasting time and temperature that these protocols allow, to maximise nutritional value.

Copra-Max is regularly tested for aflatoxins and nutritional composition.

Copra-Max allows horse owners the benefits of a cost effective feed, that supports optimum health and performance for all horse breeds in all disciplines.
